

Up to **75%** of students do not purchase the required coursebooks for their courses – many because of financial reasons.

Modern quality textbooks in Polish should not be a luxury. We are closing equity gaps for university students one book at a time.

More than just a book...

professionally developed and peer-reviewed
by professors and industry experts

free forever

can be used online or downloaded as PDF

an Open Educational Resource –
free to reuse or modify

flexible formats on computers and mobile devices

Appreciated by students...

I'VE READ THE TEXTBOOK FROM COVER TO COVER.

It's written in a comprehensible manner. It includes many practice exercises with answers. I especially like the sections where a strategy of solving different types of exercises is described step by step. On top of that, the textbook is online, so I can access it anywhere.

– Patryk, Warsaw University of Technology student

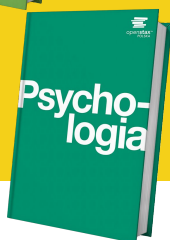

With modern digital technology, high-quality textbooks should be a **one-time cost** and **free** to the world thereafter.

Our first textbook, **UNIVERSITY PHYSICS**, published in 2018, has already saved Polish students over **25M PLN**.

65% (or 121 of 186) of Polish universities in the target market (altogether **48,500 students nationwide**) use the book. The content was developed in cooperation with **72** professors. The book has 3 volumes, 3K pages and 4K+ exercises.

In December 2020, we published our second textbook, **PSYCHOLOGY**, in conjunction with **25** professors. This textbook has 700 pages and 500+ exercises.

LOCATIONS OF ONLINE
"PHYSICS" USERS IN 2020

In the next 10
years, we plan
to have:

387_M
PLN projected
cumulative savings

3.3_M
projected cumulative
number of student users

20
open textbooks
published

A well-educated society profits us all. Let's make this investment together.
